TSFCOLLAPSIBLE GATES

Gate construction and Weight

Made to measure collapsible security gates manufactured from high grade steel. Picket sections 2.5mm, lattice sections 2mm and 'W' profile 53mm x 33mm bottom track formed from 1.5mm steel which the gate runs on for a smooth side to side operation.

Weight 24kg/m²

Installation

Collapsible gates can either be face fixed or reveal fixed. Single or double stack is available with a hinge aside option, plus hinge up tracks if required to leave a free clear ease of access without trip hazards.

Locking

Collapsible gates as standard come with single face fix locks, if over 1.2m high they will have 2 locks. Collapsible gates with upgraded hook locks if over 1.5m high will have 2 locks fitted.

Finishes/ Colour

Polyester Powder Coated (PPC) to white RAL 9016 as standard or to any stocked BS or RAL colour at additional cost.

Applications

Medium to high security on domestic, retail or commercial applications, manufactured from high grade steel for additional security.
